

VAPT

(Vulnerability Assessment and Penetration Testing)

1. Tidak ada implementasi CSRF di form login. Kode login bisa dilihat dibawah:

```
<body>
  <div class="container">
    <h2>Secure Login</h2>
    <form method="POST" action="login.php">
      <label for="username">Username:</label>
      <input type="text" id="username" name="username" required>
      <label for="password">Password:</label>
      <input type="password" id="password" name="password" required>

      <label for="captcha_input">Kode Verifikasi:</label>
      <div class="captcha-box">
        <span class="captcha-code">PZ32Q</span>
      </div>
      <input type="text" id="captcha_input" name="captcha_input"
autocomple="off">
      <input type="hidden" name="redirect_url" value="dashboard.php">
      <input type="submit" value="Login">
    </form>
  </div>
</body>
```
